**To: Parents of Fifth Grade Students**

**Re: Growth and Development/Puberty Program  
(Human Life and Sexuality)**

Between May 26 and May 29, the fifth grade students will participate in the Growth and Development/Puberty Class. This program is taught at various times throughout the day, depending on your child's classroom schedule.

The topics to be covered in the boys' class include: Puberty and the changes associated with it, the male reproductive system, personal privacy, personal hygiene, and a brief introduction to the internal female reproductive organs and the menstrual cycle. It also contains a discussion of HIV/AIDS.

The topics to be covered in the girls' class include: Puberty and the changes associated with it, the female reproductive system, personal privacy, menstruation and the menstrual cycle, personal hygiene, and a brief introduction to the male reproductive system. It also contains a discussion of HIV/AIDS.

All fifth grade female staff will be the instructors for the girls and all fifth grade male staff will be the instructors for the boys. All materials used have been approved and are tactfully presented. Parents wishing to preview the materials are welcome to contact the school office to arrange an appropriate time to do so.

Students may opt out of participation in the program only with parental consent. Below, please indicate if this is your decision and **return the bottom portion of this letter to school by Friday, May 15.**

If you have any questions, please feel free to call 488-5060.

Sincerely,

Andy Fuehr  
Thomas M. Ryan Principal

## STD Toolkit

Sexually Transmitted Disease

KALAMAZOO COUNTY  
HEALTH AND COMMUNITY SERVICES DEPARTMENT

Promoting Health For All

### *A Clinician's and Health Professional's Guide*

You're Invited  
Kalamazoo County STD Task Force Meeting  
Thursday, November 19, 2015  
12:00 pm to 1:00 pm  
KCHCS Department (3299 Gull Road; Nazareth Complex)

[Event Flyer](#)

In Kalamazoo County, Sexually Transmitted Diseases (STDs) make up more than 77% of the reportable communicable diseases.

Kalamazoo County has the 2nd highest ranking for **Gonorrhea** in the State of Michigan.

Kalamazoo County has the 2nd highest rates for **Chlamydia** in the State of Michigan.

STDs in Kalamazoo County are continuing to **increase** in incidence and prevalence.

A reduction in STD rates will only be achieved through a community wide public health initiative. This tool kit - The STD Toolkit - is the ground work for this initiative. Through the collaboration of community healthcare providers, professionals from Kalamazoo County Health and Community Services and with support from other local health departments (LHD), this toolkit has become a reality. It is designed to be a consistent and comprehensive plan for action against the increasing rates of STDs county-wide. All information provided is designed to be an evidence based tool to allow healthcare professionals, clinicians, public health workers, and community members alike to take a proactive role and to achieve control of this growing health threat.

Within this toolkit, Providers will find resources to assist with the screening, testing, treatment, education, and counseling of at risk individuals in the county. We encourage you to explore this tool and use it in your own practices and offices. Information provided will help to keep healthcare providers up to date on the latest diagnostic and treatment protocols for STDs, as well as the public health benefits and effects of early and comprehensive community intervention over time on STD rates and statistics for Kalamazoo County.
